Byte Software Announces Integration to LSSI's Document Preparation Software

Interface between Byte Software's BytePro and LSSI's Docs3D will streamline processes for mutual clients.

KIRKLAND, WA: April 26, 2010 – Byte Software, a leading provider of mortgage software solutions for banks, credit unions, mortgage bankers and mortgage brokers, announces a partnership with LSSI (aka Lender Support Systems, Inc.), to offer mortgage document preparation services. A mutual goal shared by Byte Software and LSSI is providing superior technology solutions to clients in an efficient and cost-effective manner.

“This strategic alliance with Byte Software assists us in delivering on the promise of service-oriented architecture. The soon to be released integration of our loan document preparation services in BytePro will provide seamless communication between our companies and full value-add for our shared clients,” stated Cary Burch, President and CEO of LSSI.

LSSI offers its clients multiple solutions for mortgage closing documents and preliminary disclosures. All documents are compliant in all 50 states and the Virgin Islands. An example of a few of LSSI's product features are accurate APR calculations, impound analysis, and Section 32 High Cost Mortgage tests.

LSSI's next generation for document preparation solution is termed "Docs3D". It was developed with the latest technologies in ASP.NET and C# to create a robust, easy to manage web based application. Docs3D will seamlessly interface within BytePro by utilizing such standards as XML and MISMO.

Once Docs3D is interfaced with BytePro, LSSI's customers will have full access to compliant loan documents that can be completed 24 hours a day, 7 days a week, and 365 days a year. The easy "one-click" access will simplify the process and benefit mutual customers.

About Byte Software

Byte Software, founded in 1985 by mortgage professionals, is a leading provider of mortgage software solutions for banks, brokers and credit unions. Byte Software products streamline processes used by originators, processors and closers, allowing them to focus on generating additional business and revenue.
